### Description:

The Wifi Relay controller converts WiFi signal to RF signal, which means you can adjust various LED light types using your Android or IOS device.

You can adjust brightness, colour temperature, RGB, RGBW & RGB+CCT all with your Smart Phone.

You can control up to 16 zones which can be split in to rooms or ares within your home or commercial premises.

Colour your life and make everyday special with 16 million colours to choose from!

DIY and record your favourite light effects with 8 scene memories. Including a Music function where the light will dance with you to the music.

Compatible with the MLV4L Receiver & MLRT10 Controller. For more information please download the instruction manual.
