

Commercial 60 24V LED Strip - ML60**

Max Run Length	10m
Width	10mm
Lumens	570 lumens per meter
LED Density	120 per meter
Wattage @ 1m	6w
Adhesive Type	3M VHB
Cut Points	50mm
Colour Temperature	3200K, 4200K, 5800K
CRI	>80
Voltage	24V

Description:

A heavy duty LED strip light designed for very long life. It has triple thickness PCB which reduces heat build up and allows the strip to work over longer lengths. You can achieve a 10m maximum run length with little visible voltage drop from the beginning to the end.

For long term reliability we have used a high grade LED chip which still performs at 96% of original output after 7000 hours of use whilst the L70 figure is >36000 hours.

Fully dimmable and operates perfectly with our control system to provide great room wide effects which are easy to control through wall switches, remote controls or via your smart phone (iOS or Android)
